WINDOWARE

S-Fold Track - Venice
Preparation and Fixing Instructions

STEP 1 – CHOOSE YOUR MOUNT.
Decide where you wish your curtain track to be fixed, on the wall (Fig. 1) or on the ceiling (Fig. 2), and use the appropriate brackets.

Note: Check your ceiling height first, as this will help determine which mount works best with your curtain length.

STEP 2 - POSITION YOUR TRACK.
There are two track positions to consider:
1. Centred to the window. Suitable if your window is in the centre of the wall.
2. Centred to the wall. Suitable if your window is off-centred to your wall, or you are using the curtain to cover your wall.

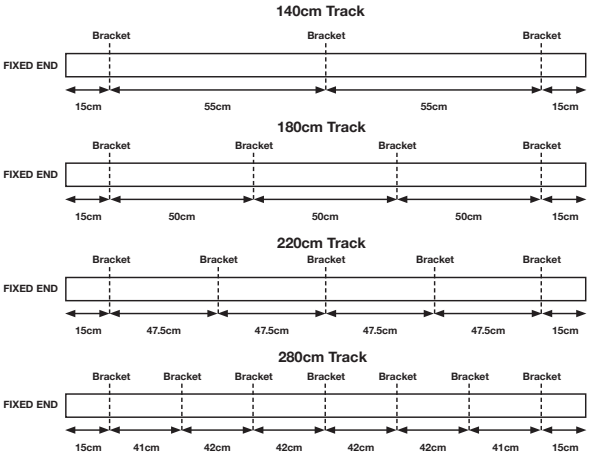

Note: We recommend your curtain track overhangs the window by a minimum of 15cm. That's 15cm above the architrave/window, and 15cm of overhang either side of the architrave/window. (Fig. 3)

Fig. 3

STEP 3 – POSITION YOUR BRACKETS.
First decide on which side will be your fixed curtain end. This is the curtain track end where your curtain will be fixed and drawn from. Begin with the outer ends of the track, position the first bracket 15cm in from each end. With the bracket held in position use a pencil to mark the holes.
Repeat this process for the remaining brackets. They should be spaced evenly over your chosen track size as per the below chart. This will ensure the curtain weight is evenly supported.

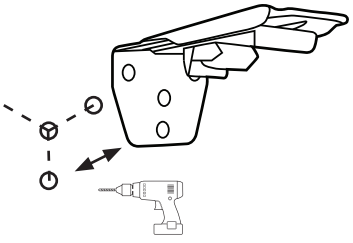

Note: If you are wall mounting, you can now check your brackets and track will all be level by using your marks. Your track must be level to operate correctly.

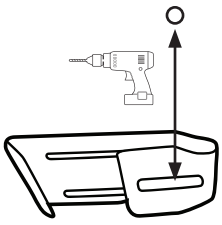

STEP 4 – PRE DRILL PILOT HOLES.
Before drilling any holes, use a stud finder to ensure the screws and brackets will be secure to your wall/ceiling.

Pre drill pilot holes using your marked positions (Fig.4). Pilot holes should be smaller then the screw size to allow screws to grip.
